### Say 'I Do' To The World's Most Exclusive Barefoot Luxury Wedding Destination

16 April 2018

North Island Seychelles, the world's most luxurious private island, is inviting couples to create the wedding of their dreams on its picture-perfect shores. What could be more romantic than a luxurious barefoot wedding ceremony on a private tropical atoll surrounded by loved ones as you say, "I do"! A once-in-a-lifetime destination fit for a once-in-a-lifetime celebration.

Located amongst the inner granitic islands of the Seychelles, North Island is a spectacular wedding venue that offers a combination of absolute privacy, effortless style, breathtaking views, and bespoke service with attention to detail – everything a bride and groom could ask for. However, North's true gift is the feeling of absolute freedom and joy that it instils in all guests! It is magical to be able to marry your soulmate on this unique island feeling connected to each other like never before.

As one of the most exclusive destinations in the world, not many couples get the opportunity to tie the knot on North Island and the island's approach to weddings reflects that. Here the world is your oyster with tailor-made packages carefully created specifically for you and your partner; exclusivity and privacy reign supreme. No two weddings are the same and North Island treats every bride and groom as the two most important people on earth; your wish is North Island's command.

These days couples are spoiled for choice when it comes to wedding-worthy beaches, but at North Island you'll experience unparalleled scenery like nowhere else on earth, not to mention the feel of the softest, whitest sands between your toes. Part of a conservation effort that has rehabilitated the natural surroundings, this untouched tropical paradise is a sanctuary for endangered fauna and flora. You may have to share your big day with giant tortoises, luminous green geckos, tropical fish and eagle rays, but you won't set sight on another soul.
